

Get started

Plug EarPods into your device and put them in your ears.

Remote and mic

In the following instructions, ● indicates a quick press of the center button and **■** indicates a press and hold of the center button. When doing multiple presses, make sure they quickly follow one another.

Control audio

- Play or pause audio.
- Skip forward.
- Fast-forward.
- Skip backward.
(Works only when audio is playing.)
- Rewind.

Manage a call

- Answer, end, or switch to an incoming call.
- To decline a call, press and hold for a few seconds.

Ask Siri

- Press and hold until you hear a beep, then let go and ask a question or make a request.

Important safety information

Hearing loss

Listening to sound at high volumes may permanently damage your hearing. Background noise, as well as continued exposure to high volume levels, can make sounds seem quieter than they actually are. Check the volume before inserting EarPods in your ears. For more information about hearing loss and about how to set a maximum volume limit, see apple.com/sound.

WARNING: To prevent possible hearing damage, do not listen at high volume levels for long periods.

Medical device interference

EarPods contain magnets and/or components and radios that emit electromagnetic fields. These electromagnetic fields might interfere with medical devices. Consult your physician and medical device manufacturer for information specific to your medical device and whether you need to maintain a safe distance of separation between your medical device and EarPods. Manufacturers often provide recommendations on the safe use of their devices around wireless or magnetic products to prevent possible interference. If you suspect EarPods are interfering with your medical device, stop using your EarPods.

Driving hazard

Use of EarPods while operating a vehicle is not recommended and is illegal in some areas. Check and obey the applicable laws and regulations on the use of earphones while operating a vehicle. Be careful and attentive while driving. Stop listening to your audio device

if you find it disruptive or distracting while operating any type of vehicle or performing another activity that requires your full attention.

Choking hazard

EarPods may present a choking hazard or cause other injury to small children. Keep them away from small children.

Skin irritation

EarPods can lead to skin irritation if not properly cleaned. Clean EarPods regularly with a soft lint-free cloth. For additional information on how to clean your device and other tips to avoid skin irritation, go to apple.com/support. If a skin problem develops, discontinue use. If the problem persists, consult a physician.

Electrostatic shock

When using EarPods in areas where the air is very dry, it is easy to build up static electricity and possible for your ears to receive a small electrostatic discharge from EarPods. To minimize the risk of electrostatic discharge, avoid using EarPods in extremely dry environments, or touch a grounded unpainted metal object before inserting EarPods.
